Proactive - controlling a situation rather than responding

Versatile - able to adapt

Meticulous- giving attention to every details

Self Intro:

Good morning sir/madam. I am Sripranesh. I have completed my Bachelor's degree in Computer Science from Sathyabama University in 2026. After graduation, I focused on enhancing my technical skills by learning Python, SQL, web technologies, and software development concepts while working on projects to gain practical experience. During this journey, I developed a strong interest in Generative AI after exploring how AI models can understand natural language, generate content, and solve real-world problems. This curiosity motivated me to learn concepts such as Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), prompt engineering, LangChain, Langflow, and API integrations. Through hands-on learning and project development, I gained valuable experience in building AI-powered applications and understanding their practical use cases. Coming to my family background, we are a family of 3 members. My family has always encouraged me to pursue my goals and continuously improve myself. I am a quick learner and am always eager to learn new technologies. I look forward to applying my skills, contributing to the organisation, and growing professionally. Thank you for giving me this opportunity to introduce myself.

June - 9

Past Tense - Action that are completed

Past Continuous tense - Actions done yesterday by this time

Past Perfect Tense - Action completed before past action (had completed the assignment before the class)
